## SHORT

---

Throughout my professional journey, I worked on a diverse range of development projects: from traditional waterfall to dynamic agile/scrum and everything in between. In different types of companies: from structured banks to fast-moving media. My roles varied from testing, over functional analysis to project management and a combination of all 3. But what was always there, is a dedicated focus on the details, on getting a product ready with the best possible quality, while working closely together with developers and business/clients.

I believe in continuous improvement: to find the custom solution that fits the task and the team at a specific moment, by staying curious and eager to learn.

## EXPERIENCE

---

**FUNCTIONAL ANALYST / QUALITY ASSURANCE / PROJECT COORDINATION | BOONDOGGLE** Jan 2018 – Jan 2024

Functional analyst, test analyst and project coordinator. Projects include public websites for clients in retail, B2B, banking, in composable architectures.

Tasks:

- Requirement gathering
- Write functional specifications
- CMS Data modelling
- Coordinate and inform the development team
- Follow up requirements and changes during development phase
- Release management
- Manual & automated testing
- Project coordination: lead scrum meetings, client communications

Tools & technologies : Jira, Confluence, Microsoft Office, UML, Cypress with javascript/typescript  
CMS (Contentful, Directus, Umbraco, Sitecore), Azure DevOps (yaml)

---

**CONSULTANT | CORALIUS (ALTEN)**

June 2011 – December 2017

**QUALITY ASSURANCE | PERSGROEP**

Dedicated QA in 1 of the Agile/Scrum development teams. To implement a continuous delivery-strategy, tests are automated using Java, Cucumber and Postman and are used in different deploy pipelines. The squad was responsible for a series of editor tools and micro-services used by other applications.

Tasks:

- Story grooming
- Manual testing
- Release management

Tools & technologies : Jira, Confluence, SQL Developer, TestRail, Postman, Quark Publishing Tools, Cucumber, Java, Jenkins, microservices, Behaviour/Test driven development

## QUALITY ASSURANCE | ROSSEL

Website and mobile app testing for different media brands, including newspaper "Le Soir".

Tasks : Design and execution of test scenarios for websites and mobile apps

Tools & technologies : Apple, Android, Redmine, MS Office, Klaros Test Management

## QUALITY ASSURANCE / FUNCTIONAL ANALYST | SIGEDIS

The DB2P project aims to create a database of 2nd pillar pensions to be able to follow up the correct application of the law and to inform each person on the status of their pension.

Tasks:

- Design and execution of test scenarios for web portal and batch processing
- Functional analysis on solution to improve data quality

Tools & technologies : Jira, Microsoft Office, XML, UML, Oracle SQL Developer, SAP BusinessObjects, soapUI

---

## CONSULTANT | LOGICA

September 2009 – June 2011

## TEAM LEAD / QUALITY ASSURANCE | BANK VAN DE POST

Apollo project: integration of Thaler banking software.

Tasks:

- Test design and execution
- Testing team lead: coordinating a team at system test execution, planning resources, follow up and reporting results.

Tools & technologies : Changepoint, QADirector, Unix, MS Office, Thaler, Oracle QSL Developer, PostStation, SoapUI
